Introduction

To enhance practical learning in finance, an interactive **Share Market Quiz** was conducted for MBA students using the **Kahoot App**. The activity aimed to provide students with hands-on exposure to stock market concepts while encouraging teamwork, competition, and critical thinking.

Description

The quiz was organized in a **team format**, where students collaborated to answer questions on topics such as stock exchanges, trading mechanisms, investment strategies, financial instruments, and current market events.

Based on their performance in earlier rounds, the teams were classified into **three categories**:

1. **High Performers** – consistently accurate and fast responses
2. **Moderate Performers** – balanced participation with scope for improvement
3. **Emerging Performers** – enthusiastic teams gaining momentum

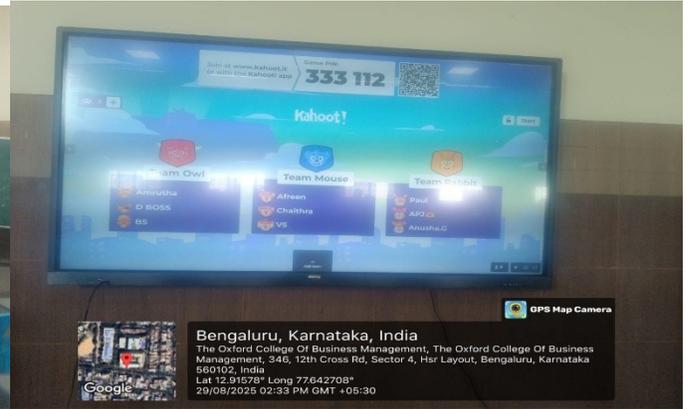

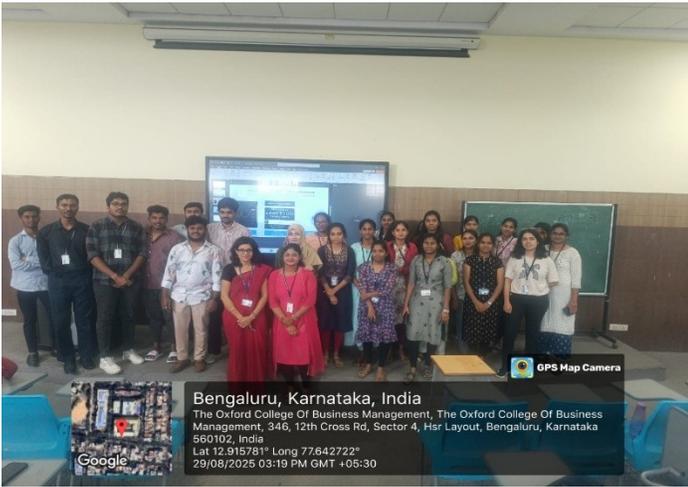

This tiered system ensured fair competition while motivating all teams to excel. In the final round, all categories competed head-to-head for the **Winner's title**. Kahoot's live leaderboard, time-based scoring, and instant feedback made the session highly engaging.

The atmosphere was energetic, with teams showcasing not just knowledge but also strategy and coordination. Faculty members also encouraged healthy discussions after tricky questions, deepening the students' understanding of share market dynamics.

Conclusion

The Share Market Quiz using Kahoot proved to be a **lively and enriching experience**. Students revised essential market concepts in a gamified manner while sharpening teamwork and decision-making skills. The three-category format added a unique dimension, ensuring inclusivity and sustained motivation throughout the event. The activity successfully combined **fun, finance, and learning**, leaving students more confident in their grasp of stock market fundamentals.
